## Delete storage account

The following storage account and its contents will be deleted.

### Resource to be deleted

 storageaccountforgdblock 

### Dependent resources to be deleted

The data provided is regularly updated about 2-4 times a day and published hourly. If your account has extremely large objects, it may be over a day between updates.

Resource	Number of instances	Total data stored
 Containers	-	-
 File shares	-	-
 Tables	-	-
 Queues	-	-

 'storageaccountforgdblock' can't be deleted because this resource or its parent has a delete lock. Locks must be removed before this resource can be deleted. [Learn more about delete locks](#)

### Step: 3

The screenshot shows the AWS IAM console interface. At the top, the breadcrumb navigation reads "myRGBAC | Locks". Below this, a search bar and action buttons (+ Add, Refresh, Feedback) are visible. A left-hand navigation menu lists various IAM features: Overview, Activity log, Access control (IAM), Tags, Resource visualizer, Events, Settings, Deployments, and Groups. The main content area displays a table with columns for Lock name, Lock type, Scope, and Notes. A message states, "This resource has no locks." At the bottom of the console, a blue header bar shows the user's email "bscs2112128@szabist.pk" and the role "DEFAULT DIRECTORY (BSCS21121...". A white notification box with a green checkmark icon displays the message: "Deleted resource group myRGBAC" followed by "Deleted resource group myRGBAC". Below the notification, a toolbar contains buttons for "Delete", "Export template", and "Open in mobile". A tooltip is visible over the "Open in mobile" button, showing the text "Open in mobile". At the bottom right of the toolbar, a link for "JSON View" is present.
